Welcome to JNSON Laboratories Pvt. Ltd.

Homoeopathy

Homoeopathy was founded over 200 years ago by **Dr. Samuel Hahnemann**, a German doctor, with his famous concept "**Similia Similibus Curentur**" which means "**Let likes cure likes**". According to Dr. Hahnemann, substances which are capable of producing morbid symptoms in a healthy human being are capable of removing the same symptoms occurring as an expression of disease, when given in micro quantities. This marked the formal beginning of homoeopathy in 1796.

Company Profile

JNSON is the one name that comes to mind for - Assured quality, cost effective medicines and instant acceptability. **JNSON** is the leading homoeopathic medicines manufacturing company in India offering a wide range of world class remedies including Generics, Single Remedies, Biochemic/Combinations as well as specialities. **Dr. S.C. Bhatia** laid the foundation stone of **JNSON** on **3rd Nov 1996**. **JNSON** is now a household name for all homoeopathic doctors. Where it is a question of quality products, one must only think of **JNSON**'s products as the highest quality products undoubtedly. Manufacturing facilities have been augmented with affiliate unit Opposite Railway Station Bazida Jattan, P.O. Madhuban, Karnal, Haryana. **JNSON** is backed by a team of successful and experienced professionals dedicated to providing the country with homoeopathic medicines as pure and perfect as possible. The strong Research and Development department of **JNSON** initiates innovative activities in developing new products and improving existing ones. When did you start this homoeopathic company? What were your good or bad experiences while establishing this company? I had started this company on **3rd Nov 1996**. However the profession was basically started by my father **Lt. Dr. Jagan Nath Bhatia**, a well known homoeopathic doctor. Being an excellent doctor himself, **Lt. Dr. Jagan Nath Bhatia** felt the need of good quality medicines in India where homoeopathy and homoeopathic doctors are considered excellent but the medicine manufacturers were not able to provide a proper range of rare homoeopathic medicines.

This thing appeared to bother him and he decided to take upon the task of establishing a homoeopathic manufacturing unit. Unfortunately, this could not happen in his lifetime. The remembrance of his teachings led me to establish **JNSON Laboratories (P) Ltd.** In the beginning results were not as expected however with God's grace, my Father's blessings and my team's hard work, now **JNSON** has established the prestigious name in the medical sphere and is manufacturing the **Widest Range of Homoeopathic medicines in the country**.

Quality Control

At **JNSON** Total Quality Management is not just a claim but also a way of life at each and every stage. It is this commitment and far-sighted relationship that extends to all levels of manufacturing right from the receipt and sorting of raw materials (herbs/salts etc.), through the different stages of Manufacturing, Packaging, Documenting, Implementing Govt policies and controlling every stage with checks and counter checks.

JNSON has a team of highly qualified and technical supervisors who monitor and control the manufacturing processes at every stage according to latest guidelines and certifications. **JNSON** is a **WHO-GMP & ISO 9001:2015 Certified Company**.

Research & Development

A centralized Quality Control & Analytical Research Laboratory has been set up to meet the domestic and international quality standards. The Company has expanded operations by building further on already existing infrastructure by investing in new premises, to include modern, state-of-the-art amenities. We believe in our mission statement "Innovative remedies for a healthier life". We successfully develop innovative products that improve, enhance and extend human life. Homoeopathy is safer, cheaper and works on certain principles & ideologies which consequently helps your body to heal faster and completely. Allopathic medicines might suppress the disease e.g. With pain killers you might not feel the pain but the root of the pain is not gone, whereas homoeopathy takes away the root cause of the pain.
